75007, Paris FRANCE

_ IN A NUTSHELL

I love learning, and sharing what I learn. My journey began with video games in cooperative mode on windows 95 with my father. Then, I went to mobile and web development. More recently, I found myself a true passion with IT security and ethical hacking and I often participate to CTFs with the team Aperi'Kube. Aside IT, I like spending hours in parks, with a guitar, a slackline and few close friends. I'm spending also much time to my other passion, Hang-gliding.

_ EXPERIENCES

Pentester | Lexfo - Paris, FRANCE — 2019 — Current
Web application, Infrastructure, and Mobile audits.
Intrusion tests on various topics and security code review.

Product Security Engineer | Datadog - New-York, USA — 6 months — 2019
